Occupancy for irregular obstacles; VLM hallucination; demonstration inconsistency
1 Observe
failures and long-tail cases in the field
2 Formalise
task, representation and metric
3D occupancy; graph VQA; PDM score; task success rate
3 Benchmark
curate data at scale; auto-label + human QA
OpenLane, OpenLane-V2*, OpenOcc, OpenScene, DriveLM-Data, AgiBot World*
4 Baseline
a simple, unified, scalable method
BEVFormer*, OccNet, DriveLM-Agent, UniAD*, FLARE*
5 Community
open source, leaderboards, challenges
Waymo 2022 (1st)*, CVPR'23 Occupancy, CVPR'24 DriveLM, AgiBot World Challenge*
6 Deploy & self-correct
closed-loop / real-world test, adapt online
Centaur (non-reactive simulation), χ_0 (real robots), ETA*, PerturBot*
Curse of reality
the deployed world keeps presenting conditions never seen in training
